## QUBE

### AUTOMATION COMPATIBILITY

#### Manual and Automated Filling

Compatible with:

- SynMed® XF, SynMed® Ultra and SynMed® Assist (tray holds 8 Qube cards; SynMed Ultra fills two trays at a time)
- VBM (tray holds 1 Qube card; VBM fills two trays at a time)
- BlistAssist® (tray holds 2 Qube cards)

### FEATURES

- Weekly medication manager: four daily doses for seven days
- High-capacity, square blisters (larger morning and night blisters)
- Clear view of medications in square blisters for easy fill and check
- Accommodates large pharmacy labels
- Cold-seal adhesive
- Customizable with pharmacy branding

### BENEFITS

- Tamper-evident design helps prevent unintended access
- Accommodates a large number of medications
- Clear instructions make it easy for patient to use
- Potential to capture incremental sales for customers looking to fully utilize the Qube's dose management capabilities (ex. vitamins, supplements)

### IDEAL FOR

- Patients, especially seniors and those with chronic diseases, managing a complex medication regime
- High-volume pharmacies with or considering automation capabilities

## FLEXRX™ AND FLEXRX™ LIGHT

### AUTOMATION COMPATIBILITY

#### Manual and Automated Filling

Compatible with:

- SynMed XF, SynMed Ultra and SynMed Assist (tray holds 8 FlexRx blisters; SynMed Ultra fills two trays at a time)
- VBM (tray holds 1 FlexRx blister; VBM fills two trays at a time, compatible with FlexRx Light only)
- BlistAssist (tray holds 2 FlexRx blisters)

### FEATURES

- Weekly medication manager: four daily doses for seven days
- Perforated blister cavities
- Medication information printed on each individual cavity
- Permanent adhesive label with convenient push-through access to medications
- Large-capacity blisters for multiple medications and vitamins
- Cold-seal adhesive
- Customizable with pharmacy branding

### BENEFITS

- Tamper-evident design helps prevent unintended access
- Unprecedented flexibility for both pharmacists and patients
- Detachable cavities offer patients portability and the convenience of carrying individual doses
- Optional customizable cover protects medication while offering important branding opportunity

### IDEAL FOR

- Active patients who are "on-the-go"
- Assisted living facilities
- Retirement communities
- High-volume pharmacies with or considering automation capabilities

## AUTO-FILL

### AUTOMATION COMPATIBILITY

#### Automated Filling

Compatible with:

- SynMed XF, SynMed Ultra and SynMed Assist (tray holds 12 Auto-Fill cards; SynMed Ultra fills two trays at a time)

### FEATURES

- Weekly medication manager: four daily doses for seven days
- Same size card and blister as Qube-It card (manual fill)
- Two-panel card, plus one-panel grid
- Larger morning and night blisters
- Cold-seal adhesive
- Customizable with pharmacy branding

### BENEFITS

- Tamper-evident design helps prevent unintended access
- Patients previously using Qube-It will not notice change to Auto-Fill
- One blister fits both Auto-Fill and Qube-It, meaning less inventory to carry and flexibility to service a wide range of patients

### IDEAL FOR

- Patients looking for one compact package with optimum medication capacity
- High-volume pharmacies with or considering automation capabilities

## TRI-FOLD

### AUTOMATION COMPATIBILITY

#### ► Manual Filling Only

Auto-Fill or Qube adherence cards are recommended substitutes for Tri-Fold users considering automation capabilities

### FEATURES

- Weekly medication manager: four daily doses for seven days
- Four blister sizes available
- Cold-seal adhesive
- Front cover protects medication
- Customizable with pharmacy branding

### BENEFITS

- Tamper-evident design helps prevent unintended access
- Multiple blister options to accommodate varying patient situations
- Ample room for multiple prescription labels on inside cover
- Easy to fill, facilitating workflow efficiency

### IDEAL FOR

- Patients at home taking multiple medications
- Patients taking time-sensitive medication, ensuring proper dose at appropriate time
- Caregivers looking to monitor which dose has been taken
- Patients whose medication is reviewed and adjusted frequently

## QUBE-IT

### AUTOMATION COMPATIBILITY

#### ► Manual and Automated Filling

Compatible with:

- BlistAssist (tray holds 4 Qube-It cards)

### FEATURES

- Weekly medication manager: four daily doses for seven days
- One blister size (larger than Tri-Fold options)
- Larger morning and night blisters
- Cold-seal adhesive
- Three-panel card
- Front cover protects medication
- Customizable with pharmacy branding

### BENEFITS

- Tamper-evident design helps prevent unintended access
- Compact option with all the benefits of Tri-Fold card
- Easy for patient to handle
- Easy for pharmacist to fill

### IDEAL FOR

- Patients looking for smaller packaging while maximizing medication capacity
- Pharmacies looking to launch an adherence card offering with the intent to eventually move to an automated filling solution – transition to Auto-Fill card is seamless for patients

## DAY PACK

### AUTOMATION COMPATIBILITY

#### ► Manual Filling Only

### FEATURES

- Holds one day's medication
- Four blisters with medication for morning, noon, dinner and night doses
- Small, convenient format
- Cold-seal adhesive
- Customizable with pharmacy branding

### BENEFITS

- Tamper-evident design helps prevent unintended access
- Slim and portable format allows patient to carry one day's medication rather than a full week's doses

### IDEAL FOR

- Active patients who are "on-the-go"
- Mental health or correctional institutions
- Supervised children attending school or day care

## DUO PACK

### AUTOMATION COMPATIBILITY

- ▶ Manual Filling Only

### FEATURES

- Weekly medication manager
- Only two blisters per day
- Compact design
- Cold-seal adhesive
- Customizable with pharmacy branding

### BENEFITS

- Tamper-evident design helps prevent unintended access
- Easily portable for patient
- One blister size facilitates storage at pharmacy

### IDEAL FOR

- Patients who require a management tool for a semi-complex medication regime (i.e., take only two doses of medication daily rather than four)

## BOTTOM-FOLD

### AUTOMATION COMPATIBILITY

- ▶ Manual Filling Only

### FEATURES

- Weekly medication manager
- Four blister sizes available
- Cold-seal (1PSA, 2PSA) or heat-seal adhesive
- Customizable with pharmacy branding

### BENEFITS

- Tamper-evident design helps prevent unintended access
- Multiple blister options to accommodate varying patient situations
- Cost effective

### IDEAL FOR

- Hospitals, long-term care, group homes
- Pharmacies looking for an economical option
