

FlexRx™ Light Medication Management System

Optimal Flexibility for Pharmacists and Patients

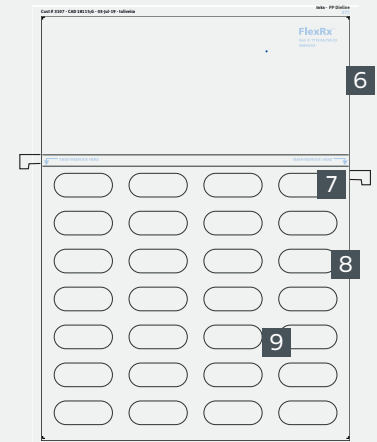

With detachable high-capacity blisters, FlexRx Light is an economical solution for patients taking multiple medications and pharmacists looking to offer a versatile medication management tool.

- 1 Summary grid provides guidance during filling and allows for easy verification of filled product
- 2 Optional hooks allow filled blisters to hang for convenient storage or in a medication cart
- 3 Shaded columns visually cue what time of day to take medication
- 4 28 cavities per package to use as a 1-week package with 4 medication passes/day
- 5 Printing on every cell indicates patient name, medication enclosed and the date/time it should be taken
- 6 Standard A4 label (8.5" x 11.69") assures compatibility with all laser printers
- 7 High-capacity blister easily accommodates multiple medications
- 8 Each medication pass time is perforated and can be detached for "on-the-go" portability, creating an easy-to-use medication cup
- 9 Blister corners absorb energy when medication is dropped during filling, decreasing the risk of "jumping" medications
- 10 Perforated label on all cavities allows easy access to medication

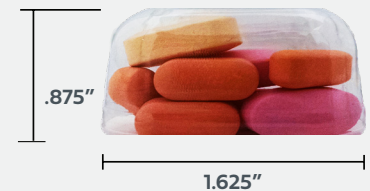

Front When Assembled

Back When Assembled

Approved for Use
in SynMed®,
BlistAssist® and VBM
Technology
