

# Warning Labels

## Multiple Options. Flexible Dispensing.

Using your feedback on which label messages are used most often, we have added to our offering a new range of prescription warning labels.

- 23 different warning label messages now available with competitive pricing.
- Strong adhesive to ensure labels stick to prescription vials.
- Labels come in a unique and easy-to-use folding carton dispenser, which works well for smaller storage spaces.
- Alternatively, label rolls can be removed from carton packaging and used in existing label dispensers. Each carton includes a removable divider card for easy arrangement in this equipment.
- Dispenser cartons are fully recyclable with no plastic overwrap on labels, promoting sustainability.

### How to Use Labels

#### Method 1: Using the Self-Dispensing Carton

Without opening the carton, simply untack the label strip from the carton and pull.

#### Method 2: Using a Label Dispenser

**Step 1:** Open the carton and remove the divider card separating the two label rolls.

**Step 2:** Insert the divider into the label dispenser to separate it from other rolls.

**Step 3:** Insert the label roll into the dispenser.
